Part X	FIN48 Footnote	The accounting standard on accounting for uncertainty in income taxes addresses the determ ination of whether tax benefits claimed, or expected to be claimed on a tax return, should be recorded in the financial statements. Under the guidance, the Organization may recognize the tax benefit from an uncertain tax position only if it is more likely than not that he tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. Examples of tax positions include the tax-exempt status of the Organization, and various positions related to the potential sources or unrelated business taxable income (UBIT). The tax benefits recognized in the financial statements from such a position are measured nased on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. There were no unrecognized tax beneifts identified or recorded as liabilities for fiscal year 2017.
